Art. no. 3213320en

INTRODUCTION 1

The work described in these setup instructions must be performed before the vehicle is delivered to the customer.

Read the setup instructions in their entirety before beginning work.

Print out the current PDI form found on the KTM Dealer.net.

These setup instructions were written to correspond to the latest state of this series. We reserve the right to make changes in the interest of technical advancement without at the same time updating this manual.

We shall not provide a description of general workshop methods. Likewise, safety rules that apply in a workshop are not specified here. It is assumed that the work will be performed by a fully trained mechanic.

All specifications are non-binding. KTM Sportmotorcycle GmbH specifically reserves the right to modify or delete technical specifications, prices, colors, forms, materials, services, designs, equipment, etc., without prior notice and without specifying reasons, to adapt these to local conditions, as well as to stop production of a particular model without prior notice. KTM accepts no liability for delivery options, deviations from illustrations and descriptions, misprints, and other errors. The models portrayed partly contain special equipment that does not belong to the regular scope of supply.

1.1 Symbols used

The meaning of specific symbols is described below.

Indicates an expected reaction (e.g. of a work step or a function).

Indicates an unexpected reaction (e.g. of a work step or a function).

Indicates a page reference (more information is provided on the specified page).

Indicates information with more details or tips.

Indicates the result of a testing step.

Denotes a voltage measurement.

Denotes a current measurement.

Denotes a resistance measurement.

1.2 Formats used

The typographical formats used in this document are explained below.

Proprietary name Identifies a proprietary name.

Name[®] Identifies a protected name.

Brand™ Identifies a trademark.

Underlined terms Refer to technical details of the vehicle or indicate technical terms, which are explained

in the glossary.

2 SETUP

2.1 Unpacking and setting up the vehicle

Remove straps and box.

- Remove the adhesive tape in the upper area of the motorcycle.

Roll down the film at the sides.

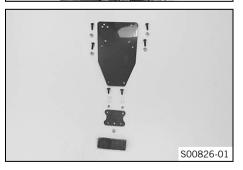

Info

To avoid damaging the motorcycle during the setup, leave the protective film on the vehicle until you have finished.

- Unpack the separate enclosure and check its contents on the basis of the enclosure list.
- Check the vehicle for transport damage.

- Position damping rubber 1 on both sides.
- Join plug-in connector 2 of the mirror on both sides.
- Position the rear mirror on both sides. Mount and tighten the screws.
- Position all controls in their exact positions on the handlebar. Tighten all screws.

- Mount the reflector.
- Remove the protective plastic.
- Carefully loosen and remove the tension belt over the swingarm.

Info

An assistant prevents the motorcycle from falling over.

- Carefully loosen and remove the tension belts around the lower triple clamp.
 - ✓ The vehicle is released at the front.
- Take the vehicle off the pallet.

2 SETUP

Warning

Risk of injury Battery acid and battery gases cause serious chemical burns.

- Keep batteries out of the reach of children.
- Wear suitable protective clothing and goggles.
- Avoid contact with battery acid and battery gases.
- Keep sparks and open flames away from the battery. Only charge in well-ventilated rooms.
- In the event of skin contact, rinse with large amounts of water. If battery acid gets in the eyes, rinse with water for at least 15 minutes and contact a physician.
- Fill the battery.

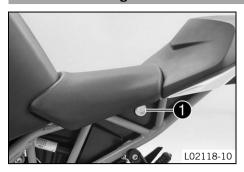

Info

Read the notes in the battery package.

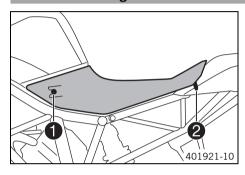

- Recharge the battery. (* p. 7)
- Install the battery. (* p. 8)
- Refuel. (p. 9)
- Print out the current PDI form found on the KTM Dealer.net and perform the predelivery inspection.
- Set kilometers or miles. (* p. 10)
- Set the clock. (* p. 10)

3.1 Removing the front rider's seat

- Insert the ignition key in seat lock 1 and turn it clockwise.
- Raise the rear of the front rider's seat, pull it toward the rear, and remove it upward.
- Remove the ignition key from the seat lock.

3.2 Mounting the front rider's seat

- Attach recesses on the front rider's seat to the fuel tank, push the front rider's seat forward, and lower at the rear.
 - ✓ Catch 2 engages in the recess.
- Check that the front rider's seat is correctly mounted.

3.3 Removing the passenger seat

Preparatory work

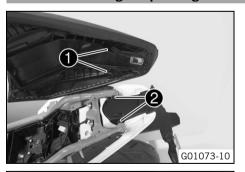

- Remove the front rider's seat. (* p. 5)

Main work

- Remove screw 1 with the washer.
- Lift and take off the passenger seat.

3.4 Mounting the passenger seat

Main work

- Position the passenger seat.
 - ✓ Both hooks 1 engage in the holders 2.
- Lower the passenger seat and push back.

Mount and tighten screw 3 with the washer.
 Guideline

Screw, passenger seat	M6	7 Nm (5.2 lbf ft)

Warning

Danger of accidents The passenger seat can come loose from the anchoring if it is not mounted correctly.

 After mounting the passenger seat, check that it is locked correctly by pulling up.

- Check that the passenger seat is correctly mounted.

Finishing work

Mount the front rider's seat. (* p. 5)

3.5 Removing the battery cover

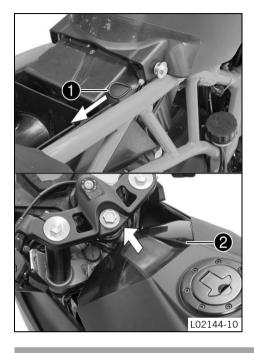

Proparatory w

Preparatory work

Remove the front rider's seat. (* p. 5)

Main work

- Pull loop 1 toward the rear.
- Pull battery cover 2 forward and remove toward the top.

3.6 Mounting the battery cover

Main work

- Position battery cover and pull toward the rear.
 - ✓ The battery cover engages with an audible click.
- Check the battery cover is seated correctly.

Finishing work

Mount the front rider's seat. (* p. 5)

3.7 Removing the battery

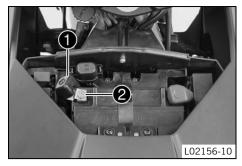

Warning

Risk of injury Battery acid and battery gases cause serious chemical burns.

- Keep batteries out of the reach of children.
- Wear suitable protective clothing and goggles.
- Avoid contact with battery acid and battery gases.
- Keep sparks and open flames away from the battery. Only charge in well-ventilated rooms.
- In the event of skin contact, rinse with large amounts of water. If battery acid gets in the eyes, rinse with water for at least 15 minutes and contact a physician.

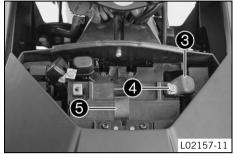

Preparatory work

- Remove the front rider's seat. (* p. 5)
- Remove the battery cover. (* p. 6)

Main work

- Pull back the negative terminal cover $oldsymbol{1}$.
- Disconnect negative cable 2 from the battery.

- Pull back the positive terminal cover 3.
- Disconnect positive cable 4 from the battery.
- Detach rubber band **5**.
- Pull the battery up and out of the battery holder.

Info

Never operate the motorcycle with a discharged battery or without a battery. In both cases, electrical components and safety devices can be damaged. The vehicle is therefore no longer roadworthy.

3.8 Recharging the battery

Warning

Risk of injury Battery acid and battery gases cause serious chemical burns.

- Keep batteries out of the reach of children.
- Wear suitable protective clothing and goggles.
- Avoid contact with battery acid and battery gases.
- Keep sparks and open flames away from the battery. Only charge in well-ventilated rooms.
- In the event of skin contact, rinse with large amounts of water. If battery acid gets in the eyes, rinse with water for at least 15 minutes and contact a physician.

Warning

Environmental hazard The battery contains elements that are harmful to the environment.

Do not dispose of batteries with the household waste. Dispose of a defective battery in an environmentally friendly manner.
 Give the battery to your authorized KTM dealer or dispose of it at a collection point for used batteries.

Info

Even when there is no load on the battery, it still loses power steadily.

The charging level and the method of charging are very important for the service life of the battery.

Rapid recharging with a high charging current shortens the battery's service life.

If the charging current, charging voltage, or charging time is exceeded, electrolyte escapes through the safety valves. This reduces the battery capacity.

If the battery is depleted from starting the vehicle repeatedly, the battery must be charged immediately.

If the battery is left in a discharged state for an extended period, it will become over-discharged and sulfate, destroying the battery.

The battery is maintenance-free, which means that the acid level does not need to be checked.

Preparatory work

- Switch off all power consumers and switch off the engine.
- Remove the front rider's seat. (♥ p. 5)
- Remove the battery cover. (* p. 6)
- Disconnect the negative cable of the battery to avoid damage to the onboard electronics.

Main work

Connect the battery charger to the battery. Switch on the battery charger.

Battery charger (58429074000)

You can also use the battery charger to test rest potential and start potential of the battery, and to test the alternator. With this device, you cannot overcharge the battery.

Info

Never remove lid 1.

Switch off the battery charger after charging and disconnect from the battery.
 Guideline

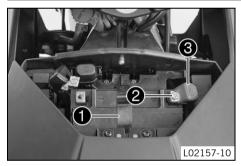

The charge current, charge voltage and charge time must not be exceeded.		
Charge the battery regularly when the motorcycle is not in use	3 months	

- Position the negative cable and mount and tighten the screw.

Finishing work

- Mount the battery cover. (* p. 6)
- Mount the front rider's seat. (* p. 5)
- Set the clock. (* p. 10)

3.9 Installing the battery

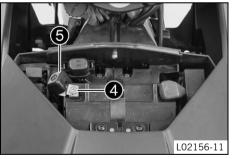

Main work

Position the battery in the battery holder.

Guideline

The terminals of the battery must face upwards.

- Attach rubber band 1.
- Position the positive cable 2 and mount and tighten the screw.
- Position positive terminal cover 3.
- Position the negative cable 4 and mount and tighten the screw.
- Position the negative terminal cover **6**.

Finishing work

- Mount the battery cover. (* p. 6)
- Mount the front rider's seat. (* p. 5)
- Set the clock. (* p. 10)

3.10 Opening the filler cap

Danger

Fire hazard Fuel is highly flammable.

- Never refuel the vehicle near open flames or burning cigarettes, and always switch off the engine first. Be careful that no fuel is spilt, especially on hot vehicle components. Clean up spilt fuel immediately.
- The fuel in the fuel tank expands when warm and may emerge if overfilled. Follow the instructions on refueling.

Warning

Danger of poisoning Fuel is poisonous and a health hazard.

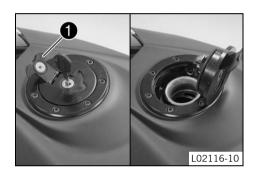

Fuel must not come into contact with the skin, eyes, or clothing. Do not breathe in the fuel vapors. If contact occurs with the eyes, rinse with water immediately and contact a physician. Immediately clean contaminated areas on the skin with soap and water. If fuel is swallowed, contact a physician immediately. Change clothing that has been contaminated with fuel. Store fuel properly in a suitable canister and keep away from children.

Warning

Environmental hazard Improper handling of fuel is a danger to the environment.

- Do not allow fuel to get into the ground water, the ground, or the sewage system.

Lift the cover 1 of the filler cap and insert the ignition key in the lock.

Note

Danger of damage Ignition key breakage.

- To take pressure off of the ignition key, push down on the filler cap. Damaged ignition keys must be replaced.
- Turn the ignition key 90° clockwise.
- Open the filler cap.
- Remove the ignition key.

3.11 Closing the filler cap

Warning

Fire hazard Fuel is highly flammable, poisonous and harmful to your health

- After closing the filler cap, ensure that it is locked properly. Change clothing that has been contaminated with fuel. Immediately clean contaminated areas on the skin with soap and water.
- Close the filler cap.
- Push down the filler cap until the lock engages.

3.12 Refueling

Danger

Fire hazard Fuel is highly flammable.

- Never refuel the vehicle near open flames or burning cigarettes, and always switch off the engine first. Be careful that no fuel is spilt, especially on hot vehicle components. Clean up spilt fuel immediately.
- The fuel in the fuel tank expands when warm and may emerge if overfilled. Follow the instructions on refueling.

Warning

Danger of poisoning Fuel is poisonous and a health hazard.

- Fuel must not come into contact with the skin, eyes, or clothing. Do not breathe in the fuel vapors. If contact occurs with the eyes, rinse with water immediately and contact a physician. Immediately clean contaminated areas on the skin with soap and water. If fuel is swallowed, contact a physician immediately. Change clothing that is contaminated with fuel.

Note

Material damage Premature clogging of the fuel filter.

 In some countries and regions, the available fuel quality and cleanliness may not be sufficient. This will result in problems with the fuel system.

- Only refuel with clean fuel that meets the specified standards.

Warning

Environmental hazard Improper handling of fuel is a danger to the environment.

- Do not allow fuel to get into the ground water, the ground, or the sewage system.

- Switch off the engine.
- Open the filler cap. (♥ p. 9)
- Fill the fuel tank with fuel up to the lower edge 1 of the fuel filler.

Total fuel tank	10 I (2.6 US gal)	Super unleaded (ROZ 95/RON 95/PON
capacity, approx.		91) (* p. 14)

- Close the filler cap. (* p. 9)

3.13 Setting the time

The ignition is on.

The motorcycle is stationary.

- Press the **MODE** button briefly and repeatedly until **ODO** appears on the display.
- Press the MODE and SET buttons for 5 10 seconds.
 - ✓ The time display begins to flash.
- Set the hours display using the MODE button.
- Set the minutes display using the **SET** button.
- Press the **MODE** and **SET** buttons for 5 10 seconds.
 - ✓ The time is set.

3.14 Setting kilometers or miles

Info

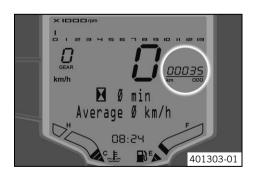

Make the country-specific setting.

Condition

The ignition is on.

The motorcycle is stationary.

- Press the MODE button briefly and repeatedly until ODO appears on the display.
- Press the **MODE** button for 5 10 seconds.
 - ✓ The display changes from **km/h** to **mph** or from **mph** to **km/h**.

5 SUBSTANCES 14

Super unleaded (ROZ 95/RON 95/PON 91)

Standard/classification

DIN EN 228 (ROZ 95/RON 95/PON 91)

Cuidalina

- Only use unleaded super fuel that matches or is equivalent to the specified fuel grade.
- Fuel with an ethanol content of up to 10 % (E10 fuel) is safe to use.

Info

Do **not** use fuel containing methanol (e. g. M15, M85, M100) or more than 10 % ethanol (e. g. E15, E25, E85, E100).
