990 Supermoto T USA

Art. no. 3211889en

KTM

The work described in these setup instructions must be performed before the vehicle is delivered to the customer.

Read the setup instructions in their entirety before beginning work.

Print out the current **PDI** form found on the **KTM DEALER.NET**.

These setup instructions were written to correspond to the latest state of this series. We reserve the right to make changes in the interest of technical advancement without at the same time updating this manual.

We shall not provide a description of general workshop methods. Likewise, safety rules that apply in a workshop are not specified here. It is assumed that the work will be performed by a fully trained mechanic.

All specifications are non-binding. KTM Sportmotorcycle AG specifically reserves the right to modify or delete technical specifications, prices, colors, forms, materials, services, designs, equipment, etc., without prior notice and without specifying reasons, to adapt these to local conditions, as well as to stop production of a particular model without prior notice. KTM accepts no liability for delivery options, deviations from illustrations and descriptions, as well as misprints and other errors. The models portrayed partly contain special equipment that does not belong to the regular scope of delivery.

REG.NO. 12 100 6061

KTM-Sportmotorcycle AG
5230 Mattighofen, Austria

1.1 Symbols used

The meaning of specific symbols is described below.

Indicates an expected reaction (e.g. of a work step or a function).

Indicates an unexpected reaction (e.g. of a work step or a function).

Indicates a page reference (more information is provided on the specified page).

Indicates information with more details or tips.

Indicates the result of a testing step.

Denotes a voltage measurement.

Denotes a current measurement.

Denotes a resistance measurement.

1.2 Formats used

The typographical formats used in this document are explained below.

Proprietary name Identifies a proprietary name.

Name[®] Identifies a protected name.

Brand[™] Identifies a trademark.

2.1 Unpacking and setting up the vehicle

- Remove the carton.
- Remove the adhesive tape in the upper area of the motorcycle.

- Roll down the film at the sides.

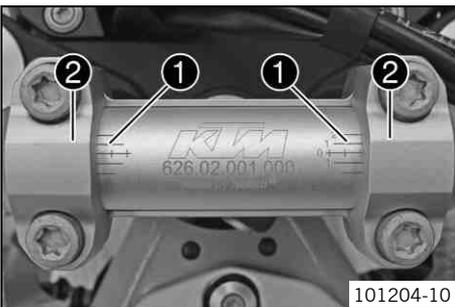

Info

To avoid damaging the motorcycle during unpacking, leave the other films on the vehicle until you have finished work on the vehicle.

- Unpack the separate enclosure and check its contents on the basis of the enclosure list.
- Check the vehicle for transport damage.

- Remove the controls from the transport holder. Remove the screws and handlebar clamps. Remove the transport holder.

- Remove the right-hand handlebar weight.
- Position the controls on the right half of the handlebar but do not tighten.
- Position the handlebar.
- Position the handlebar clamps. Mount the four screws but do not tighten.
- Position the handlebar exactly.
 - ✓ The marking ① of the scale on the handlebar must align with the edge ② of the handlebar clamp.
- Tighten the four screws evenly.

Guideline

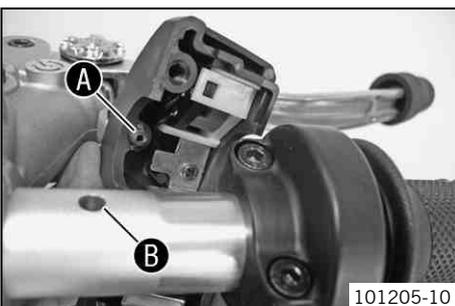

Screw, handlebar clamp	M8	20 Nm (14.8 lbf ft)
------------------------	----	------------------------

- Position the right combination switch. Tighten the screws.

Info

Position holding lug **A** in bore **B**.

- Position the hand brake cylinder. Tighten the screws.

Guideline

Remaining chassis screws	M6	10 Nm (7.4 lbf ft)
--------------------------	----	--------------------

- Position the throttle grip. Tighten the screws.

Guideline

Remaining chassis screws	M5	5 Nm (3.7 lbf ft)
--------------------------	----	-------------------

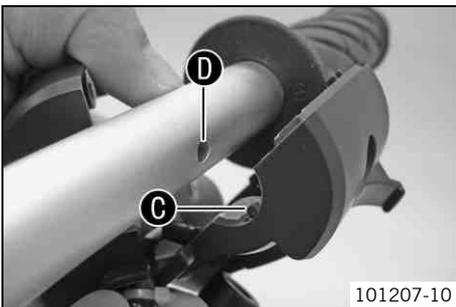

- Mount and tighten the right handlebar weight.

Guideline

Remaining chassis screws	M6	10 Nm (7.4 lbf ft)
--------------------------	----	--------------------

101206-01

- Position the left combination switch. Tighten the screws.

Info

Position holding lug **C** in bore **D**.

101208-01

- Position the clutch master cylinder and tighten the screw.

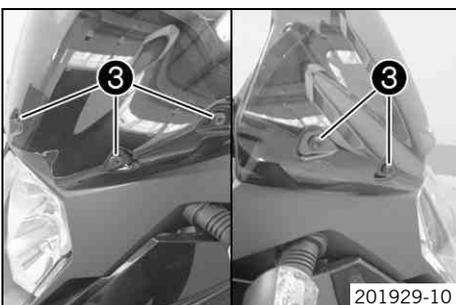

Guideline

Remaining chassis screws	M6	10 Nm (7.4 lbf ft)
--------------------------	----	--------------------

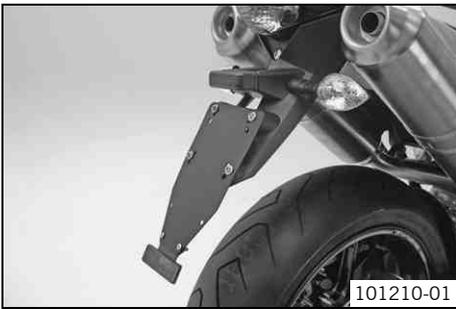

101209-01

- Mount and tighten the rear mirror adapter and rear mirror on both sides.

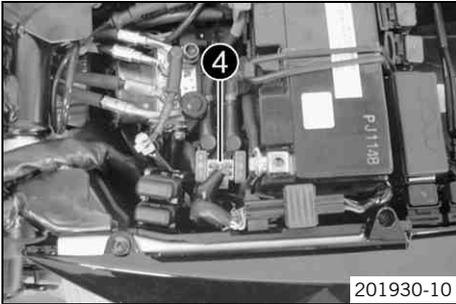

201929-10

- Remove the film from the headlight. Position the screen. Mount and tighten the screws with washers **3**.

- Mount the reflector.

- Remove the seat. (☛ p. 6)
- Recharge the battery. (☛ p. 6)
- Plug in connector 4.
- Secure the tool set with the rubber holder.
- Remove the protective film from the seat.
- Mount the seat. (☛ p. 6)
- Carefully loosen and remove the tensioning belt over the swingarm.

i Info

An assistant prevents the motorcycle from falling over.

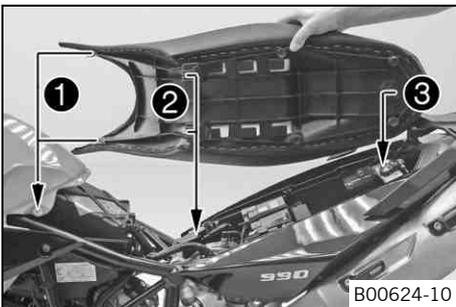

- Carefully loosen and remove the tensioning belts around the lower triple clamp.
✓ The vehicle is released at the front.
- Together with an assistant, take the vehicle off the pallet.
- Remove the protective plastic.
- Refuel. (☛ p. 8)
- Print out the current **PDI** form found on **KTM DEALER.NET** and perform the delivery inspection.
- Set kilometers or miles. (☛ p. 9)
- Set the clock. (☛ p. 9)

3.1 Removing the seat

- Insert the ignition key in the seat lock ❶ and turn it clockwise.
- Raise the rear of the seat, push it towards the rear, and remove it upwards.
- Remove the ignition key from the seat lock.

3.2 Mounting the seat

- Position front recesses ❶ of the seat on the oval head screws of the fuel tank, lower the rear and simultaneously push it forward. Both lugs ❷ must hook into the frame and locking bolt ❸ must be inserted into the lock housing.
- ✓ The seat engages with an audible click.
- Finally, check that the seat is correctly mounted.

3.3 Recharging the battery

Warning
Risk of injury Battery acid and battery gases cause serious chemical burns.

- Keep batteries out of the reach of children.
- Wear suitable protective clothing and goggles.
- Avoid contact with battery acid and battery gases.
- Keep the battery away from sparks or open flames. Charge only in well-ventilated areas.
- In the event of skin contact, rinse with large amounts of water. If battery acid gets in the eyes, rinse with water for at least 15 minutes and contact a physician.

Warning
Environmental hazard The battery contains elements that are harmful to the environment.

- Do not discard batteries with the household trash. Dispose of a defective battery in an environmentally compatible manner. Give the battery to your KTM dealer or to a recycling center that accepts used batteries.

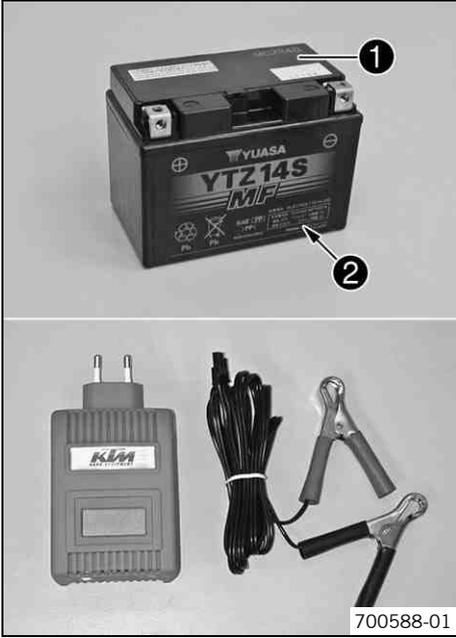

Warning
Environmental hazard Hazardous substances cause environmental damage.

- Oil, grease, filters, fuel, cleaners, brake fluid, etc., should be disposed of as stipulated in applicable regulations.

i Info
 Even when there is no load on the battery, it discharges steadily.
 The charge state and the type of charge are very important for the service life of the battery.
 Rapid recharging with a high charging current shortens the battery's service life.
 If the charging current, charging voltage and charging time are exceeded, electrolyte escapes through the safety valves. This reduces the battery capacity.
 If the battery is depleted from starting the vehicle repeatedly, the battery must be charged immediately.
 If the battery is left in a discharged state for an extended period, it will become over-discharged and sulfate, destroying the battery.
 The battery is maintenance-free, i.e., the acid level does not have to be checked.

Preparatory work

- Switch off all power consumers and switch off the engine.
- Remove the seat. (🔧 p. 6)

- Disconnect the negative (minus) cable of the battery to avoid damage to the motorcycle's electronics.

Main work

- Connect the battery charger to the battery. Switch on the battery charger.

Battery charger (58429074000)

You can also use the battery charger to test the rest potential and start potential of the battery, and to test the alternator. With this device, you cannot overcharge the battery.

Info

Never remove lid ❶.

Charge the battery to no more than 10% of the capacity specified on battery housing ❷.

- Switch off the charger after charging. Reconnect the battery.

Guideline

The charge current, charge voltage and charge time must not be exceeded.

Charge the battery regularly when the motorcycle is not in use	3 months
--	----------

Finishing work

- Mount the seat. (☛ p. 6)

3.4 Opening the filler cap

Danger

Fire hazard Fuel is highly flammable.

- Never refuel the vehicle near open flames or burning cigarettes, and always switch off the engine first. Be careful that no fuel is spilt, especially on hot vehicle components. Clean up spilt fuel immediately.
- Fuel in the fuel tank expands when warm and can escape if the tank is overfilled. See the notes on refueling.

Warning

Danger of poisoning Fuel is poisonous and a health hazard.

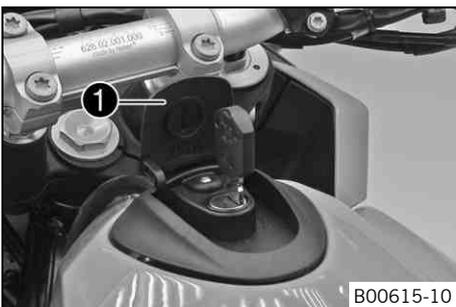

- Avoid contact between fuel and skin, eyes and clothing. Do not inhale fuel vapors. If fuel gets into your eyes, rinse immediately with water and contact a doctor. Wash affected skin areas immediately with soap and water. If fuel is swallowed, contact a doctor immediately. Change clothing that has come into contact with fuel. Store fuel in a suitable canister according to regulations and keep it out of the reach of children.

Warning

Environmental hazard Improper handling of fuel is a danger to the environment.

- Do not allow fuel to get into the ground water, the ground, or the sewage system.

- Lift the cover of the filler cap ❶ and insert the ignition key.

Note

Danger of damage Ignition key breakage.

- To take pressure off of the ignition key, push down on the filler cap. Damaged ignition keys must be replaced.

- Turn the ignition key 90° counterclockwise and remove the filler cap.

Info

The filler cap has a tank air vent system.

3.5 Closing the filler cap

B00616-01

- Put the filler cap back on and turn the ignition key 90° clockwise.
- Remove the ignition key and fold down the cover.

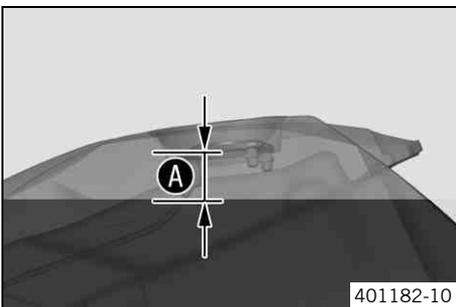

3.6 Refueling

- Danger** **Fire hazard** Fuel is highly flammable.
- Never refuel the vehicle near open flames or burning cigarettes, and always switch off the engine first. Be careful that no fuel is spilt, especially on hot vehicle components. Clean up spilt fuel immediately.
 - Fuel in the fuel tank expands when warm and can escape if the tank is overfilled. See the notes on refueling.

- Warning** **Danger of poisoning** Fuel is poisonous and a health hazard.
- Avoid contact of the fuel with skin, eyes and clothing. Do not inhale fuel vapors. If fuel gets into your eyes, rinse immediately with water and contact a doctor. Wash affected skin areas immediately with soap and water. If fuel is swallowed, contact a doctor immediately. Change clothing that has come into contact with fuel.

- Note**
- Material damage** Premature clogging of the fuel filter.
- In some countries and regions, the available fuel quality and cleanliness may not be sufficient. This will result in problems with the fuel system.
 - Only refuel with clean fuel that meets the specified standards.

- Warning** **Environmental hazard** Improper handling of fuel is a danger to the environment.
- Do not allow fuel to get into the ground water, the ground, or the sewage system.

401182-10

- Switch off the engine.
- Open the filler cap. (☛ p. 7)
- Fill the fuel tank with fuel no higher than level **A**.

Guideline

Distance A	35 mm (1.38 in)	
Total fuel tank capacity, approx.	19 l (5 US gal)	Super unleaded (ROZ 95/RON 95/PON 91) (☛ p. 12)

- Close the filler cap. (☛ p. 8)
- Press the **SET** button **2** for two seconds.
- ✓ The low fuel warning lamp **1** goes out. **TRIP F** is set to **0.0** and the display returns to the previous display mode.

400885-12

- Info**
- If the **SET** button **2** is not pressed, the value is automatically reset after approx. 3 minutes.

3.7 Setting kilometers or miles

Info

If you change the unit, the value **ODO** is retained and converted accordingly. Making the setting according to the country.

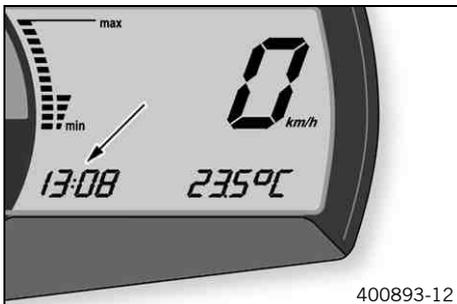

Condition

The motorcycle is stationary.

- Switch on the ignition by turning the ignition key to the **ON**  position.
- Press the **MODE** button repeatedly until the **ODO** mode is active.
- Keep the **MODE** button pressed until the display mode changes from **km/h** to **mph** or from **mph** to **km/h**.

3.8 Setting the clock

Condition

The motorcycle is stationary.

- Switch on the ignition by turning the ignition key to the **ON**  position.
- Press the **MODE** button repeatedly until the **ODO** mode is active.
- Keep the **MODE** button and the **SET** button pressed simultaneously.
 - ✓ The time display begins to flash.
- Press the **MODE** button to set the hour.
- Press the **SET** button to set the minute.
- Keep the **MODE** button and the **SET** button pressed simultaneously.
 - ✓ The time is set.

4 TECHNICAL DATA - TIGHTENING TORQUES FOR CHASSIS

Remaining frame bolts	EJOT Delta PT 50x12	1.2 Nm (0.89 lbf ft)	–

Super unleaded (ROZ 95/RON 95/PON 91)

According to

- DIN EN 228 (ROZ 95/RON 95/PON 91)

Guideline

- Only use unleaded super fuel that matches or is equivalent to the specified fuel grade.
- Fuel with an ethanol content of up to 10 % (E10 fuel) is safe to use.

Info

Do **not** use fuel containing methanol (e. g. M15, M85, M100) or more than 10 % ethanol (e. g. E15, E25, E85, E100).
