Protective functions: To reduce the severity of injuries caused by impacts.  
The protectors give a limited protection against mechanical impact in case of accidents.

Typical test results obtained (see also Test Report): Method: planar face drop striker at 50 J;  
ambient and wet conditioning;  
Performance level: **1**

Note: The Standard provides 2 performance levels with level 2 meaning the higher performance. The protective functions depend on the correct positioning of the protector, which falls within the responsibility of the user.

Marking: printed on the protector and includes the following information:  
(see example below) - CE Marking indicating the conformity of the PPE to the provisions of the Directive 89/686/CEE (and later amendments);  
- name of the manufacturer;  
- designation of the product;  
- reference to the Technical Harmonized Standard;  
- pictogram for motorcycle use, including the type of protector, the size indication according to Table 1 of EN 1621-1:2012, and the performance level reached.

Note: the Technical File contains a more detailed description of the PPE (material, method of assembly, photographs or drawings), performance data, safety functions and level of protection, elements of conformity to the basic and supplementary requirements. The Technical File is integral part of the present Certification, which has to be kept available by the applicant to be forwarded - upon request - to the entitled person (supervising body, Controlling Officer).
